

VIII. MINI PROJECT – EPL ANALYSIS (2000 - 2025)

AIM:

To clean, analyze, and visualize English Premier League (EPL) match data using Python, Power BI, and Tableau to identify trends in goals, match results, team performance, and other match statistics.

DOMAIN:

Football - English Premier League Analysis (2000 - 2025)

PROBLEM STATEMENT:

To analyze EPL match data containing match results, goals, shots, corners, and cards, and develop meaningful visualizations and interactive dashboards to identify season-wise performance trends, match outcomes, scoring patterns, home and away performance, and relationships between different match statistics. The project aims to transform the raw match data into useful insights through Python, Power BI, and Tableau for better understanding and comparison of EPL match performance.

OUTPUT:

Python:

Top 10 Teams by Wins:

Man United	552
Arsenal	534
Chelsea	533
Liverpool	530
Man City	500
Tottenham	440
Everton	348
Newcastle	315
Aston Villa	279
West Ham	272

Name: count, dtype: int64

```

===== EPL ANALYSIS SUMMARY =====
Total Matches: 9380
Total Goals: 25495
Average Goals per Match: 2.72
Home Wins: 4299
Draws: 2313
Away Wins: 2768
Highest Goals in a Match: 11
=====

```

Power BI:

Tableau:

RESULT:

The EPL match dataset was successfully cleaned and analyzed using Python, and interactive dashboards were created using Power BI and Tableau to visualize season-wise goals, match results, shots versus goals, and highest-scoring matches.
